Author index to volumes 140–148

Ahmed, M.
See AlGhamdi, J.
Ajroud, H.B., Jaoua, A. and Kaabi, S.
Classes extraction from procedural programs, 140:283
Al-Ghamdi, M.
See Elshafei, M.
Al-Muhtaseb, H.
See Elshafei, M.
Alexandre, F.
See Frezza-Buet, H.
AlGhamdi, J., Elish, M. and Ahmed, M.
A tool for measuring inheritance coupling in object-oriented systems, 140:217
Andersson, M.L.
See Jonsson, P.
Ando, S., Sakamoto, E. and Iba, H.
Evolutionary modeling and inference of gene network, 145:237
Andreae, P.
See Molla, M.
Aoe, J.-i.
See Shishibori, M.

Bäck, T.
Adaptive business intelligence based on evolution strategies: some application examples of self-adaptive software, 148:113
Bamber, D.
See Goodman, I.R.
Bandyopadhyay, S. and Maulik, U.
An evolutionary technique based on K-Means algorithm for optimal clustering in $\mathbb{R}^N$, 146:221
Bannai, H.
See Maruyama, O.
Banon, G.J.F.
See de Moraes, R.M.
Belenki, A.
See Matsuoka, H.
Bělohlávek, R.
Determinism and fuzzy automata, 143:205
Benedikt, J., Reinberg, S. and Riedl, L.
A GIS application to enhance cell-based information modeling, 142:151
Berzins, V.
See Nada, N.
Bhargava, B.
See Madria, S.K.
Bhowmick, S.S.
See Madria, S.K.
Bhutani, K.R., Chaudhuri, B.B. and Rosenfeld, A.
Corrigendum to "A modified Hausdorff distance between fuzzy sets", 148:233
Blattner, F.
See Molla, M.
Bonabeau, E.
Graph multidimensional scaling with self-organizing maps, 143:159
Bonnevay, S.
See Largeron, C.

Calabrese, P.G.
Deduction with uncertain conditionals, 147:143
Cam, M.C.
See Sidorov, I.A.
Castillo, O.
See Melin, P.
Caulfield, H.J.
Synthetic simultaneity – natural and artificial, 144:143
Cervera, E. and del Pobil, A.P.
Sensor-based learning for practical planning of fine motions in robotics, 145:147
Chakraborty, B. and Chakraborty, G.
A new feature extraction technique for on-line recognition of handwritten alphanumeric characters, 148:55

PII: S0020-0255(02)00419-X

Chakraborty, G.
See Chakraborty, B.
Chang, C.-C., Chen, T.-S. and Chung, L.-Z.
A steganographic method based upon JPEG and quantization table modification, 141:123
Chang, M.-S.
See Kobayashi, I.
Chang, R.-I., Chen, M.-C., Ho, J.-M. and Ko, M.-T.
Schedulable region for VBR media transmission with optimal resource allocation and utilization, 141:61
Chaudhuri, B.B.
See Bhutani, K.R.
Chen, G. and Wei, Q.
Fuzzy association rules and the extended mining algorithms, 147:201
Chen, A.L.P.
See Kuo, T.C.T.
Chen, D.
See Cowan, R.D.
Chen, T.-S.
See Chang, C.-C.
Chen, M.-C.
See Chang, R.-I.
Chen, W.-S.E. and Hu, C.-L.
A mobile agent-based active network architecture for intelligent network control, 141:3
Cheng, H.D. and Xu, H.
A novel fuzzy logic approach to mammogram contrast enhancement, 148:167
Chia-I Chang, F.
Intelligent assessment of distance learning, 140:105
Chin, K.S.
See Xu, Z.B.
Chou, C.-H. and Teng, J.-C.
A fuzzy logic controller for traffic junction signals, 143:73
Chung, C.-W.
See Lee, S.-L.
Chung, L.-Z.
See Chang, C.-C.
Chung, Y.D.
See Yang, W.S.
Corke, P.I.
See Roberts, J.M.
Cowan, R.D., McKendall Jr, A., Mili, A., Yang, L., Wang, L., Chen, D., Janardhana, V. and Spencer, T.
Software engineering technology watch, 140:195
Criado, F., Gachechiladze, T., Meladze, H. and Tsertsradze, G.
The bag model in language statistics, 147:13

Dang, C.Y.
See Xu, Z.B.
de Moraes, R.M., Banon, G.J.F. and Sandri, S.A.
Fuzzy expert systems architecture for image classification using mathematical morphology operators, 142:7
De Schutter, J.
See Oussalah, M.
del Pobil, A.P.
See Cervera, E.
Deng, B.
See Jiang, M.
Dharmaraja, S.
See Trivedi, K.S.
Dimitrov, D.S.
See Sidorov, I.A.
Dogrusoz, U.
Two-dimensional packing algorithms for layout of disconnected graphs, 143:147
Dönderler, M.E., Ulusoy, Ö. and Güdükbay, U.
A rule-based video database system architecture, 143:13
Duff, E.S.
See Roberts, J.M.
Duffy, V.G.
See Lin, F.
Durrant-Whyte, H.
See Rosenblatt, J.

Elish, M.
See AlGhamdi, J.
Elshafei, M., Al-Muhtaseb, H. and Al-Ghamdi, M.
Techniques for high quality Arabic speech synthesis, 140:255
Erkmen, İ.
See Gürkan, E.
Erkmen, A.M.
See Gürkan, E.

Falkenauer, E. and Fogel, D.B.
A note on the hierarchical nature of *n*-parent variation operators in evolutionary algorithms, 141:273
Fogel, D.B.
See Falkenauer, E.
Forgionne, G.A.
Selecting rail grade crossing investments with a decision support system, 144:75
Fortemps, P.
See Kunsch, P.L.
Frezza-Buet, H. and Alexandre, F.
From a biological to a computational model for the autonomous behavior of an animat, 144:1
Fukuda, T.
See Kiguchi, K.

Gacek, A.
See Pedrycz, W.
Gachechiladze, T.
See Criado, F.
Gammoudi, M.M. and Nafkha, I.
A formal method for inheritance graph hierarchy construction, 140:295
Gee, D.
See Sidorov, I.A.
Gielen, G.
See Jiang, M.
Glasner, J.
See Molla, M.
Goodman, I.R., Bamber, D., Nguyen, H.T. and Torrez, W.C.
New applications of relational event algebra to fuzzy quantification and probabilistic reasoning, 148:87
Grégoire, É. and Mazure, B.
About the incremental validation of first-order stratified knowledge-based decision-support systems, 142:117
Gu, J. and Gu, X.
Evolutionary analysis of functional divergence in TGF-β signaling pathway, 145:195
Gu, X.
See Wang, Y.
Gu, X.
See Gu, J.
Gu, X.
See Huang, W.
Güdükbay, U.
See Dönderler, M.E.
Gürkan, E., Erkmen, İ. and Erkmen, A.M.
Two-way fuzzy adaptive identification and control of a flexible-joint robot arm, 145:13

Hagras, H. and Sobh, T.
Intelligent learning and control of autonomous robotic agents operating in unstructured environments, 145:1
Hartanto, F.
See Reisslein, M.
Hirano, S.
See Tsumoto, S.
Ho, J.-M.
See Chang, R.-I.
Ho, Y.C.
See Li, D.
Ho, Y.C.
See Martin, C.F.
Holmquist, S. and Narayanan, N.H.
An integrated architecture for tightly coupled design and evaluation of educational multimedia, 140:127
Hong, D.H. and Lee, S.
Some algebraic properties and a distance measure for interval-valued fuzzy numbers, 148:1
Hosack, D.A.
See Sidorov, I.A.
Howarth, M.
See Lopez-Juarez, I.
Hsieh, C.H.
Optimization of fuzzy production inventory models, 146:29
Hu, C.-L.
See Chen, W.-S.E.
Huang, C.-F.
An application of calculated fuzzy risk, 142:37
Huang, T.S.
See Zhou, X.S.
Huang, W., Nettleton, D. and Gu, X.
Expression pattern of yeast sporulation: a case study for regulatory changes after yeast genome duplication, 145:261
Hung, S.-l.
See Lam, K.-W.
Hung, W.-L. and Wu, J.-W.
Correlation of intuitionistic fuzzy sets by centroid method, 144:219

Iba, H. and Mimura, A.
Inference of a gene regulatory network by means of interactive evolutionary computing, 145:225
Iba, H.
See Ando, S.
Inoue, A.
See Okazaki, T.
Inoue, K.
See Okazaki, T.
Ito, A.
See Okazaki, T.

Jabedar-Maralani, P.
See Mousavi, A.
Jamieson, I.M.D.
See Sutton, J.P.
Janardhana, V.
See Cowan, R.D.
Jaoua, A.
See Ajroud, H.B.
Jia, X.
See Yang, Y.
Jiang, M., Gielen, G., Deng, B. and Zhu, X.
A fast learning algorithm for time-delay neural networks, 148:27
Jin, Q.
Design of a virtual community based interactive learning environment, 140:171
Jonsson, P., Laurio, K., Lubovac, Z., Olsson, B. and Andersson, M.L.
Using functional annotation to improve clusterings of gene expression patterns, 145:183
Juang, J.-G.
Intelligent locomotion control on sloping surfaces, 147:229
Jun, Y.B.
On filters of implicative semilattices, 143:197
Junaidu, S.B. and Trinder, P.W.
Parallelising large irregular programs: an experience with Naira, 140:229

Kaabi, S.
See Ajroud, H.B.
Kahraman, C., Ruan, D. and Tolga, E.
Capital budgeting techniques using discounted fuzzy versus probabilistic cash flows, 142:57
Kak, S.
A class of instantaneously trained neural networks, 148:97
Kaneta, Y., Shoji, N., Ohkawa, T. and Nakamura, H.
A method of comparing protein molecular surface based on normal vectors with attributes and its application to function identification, 146:41
Khan, M.A.
See Sarfraz, M.
Kiguchi, K., Watanabe, K. and Fukuda, T.
Generation of efficient adjustment strategies for a fuzzy-neuro force controller using genetic algorithms – application to robot force control in an unknown environment, 145:113
Kim, M.H.
See Lim, S.
Kim, M.H.
See Yang, W.S.
Kim, J.S., Sohn, B.A. and Whang, B.G.
A tolerance approach for unbalanced economic development policy-making in a fuzzy environment, 148:71
Kim, T.W. and Yuh, J.
Application of on-line neuro-fuzzy controller to AUVs, 145:169
Kim, S.-W.
On batch-constructing B^+-trees: algorithm and its performance evaluation, 144:151
Kiritsi, S.
See Papadimitriou, G.I.
Klette, R.
See Rosenfeld, A.
Knoll, A.
See Zhang, J.
Ko, M.-T.
See Chang, R.-I.
Kobayashi, I., Chang, M.-S. and Sugeno, M.
A study on meaning processing of dialogue with an example of development of travel consultation system, 144:45
Köper, S.
See Zhang, J.
Kuhara, S.
See Maruyama, O.
Kuno, Y.
See Tsuda, K.
Kunsch, P.L. and Fortemps, P.
A fuzzy decision support system for the economic calculus in radioactive waste management, 142:103

Kuo, T.C.T. and Chen, A.L.P.
A mask matching approach for video segmentation on compressed data, 141: 169

Lam, K.-W., Son, S.H., Lee, V.C.S. and Hung, S.-l.
Relaxing consistency requirement for read-only transactions, 143:115
Largeron, C. and Bonnevay, S.
A pretopological approach for structural analysis, 144:169
Laurio, K.
See Olsson, B.
Laurio, K., Linåker, F. and Narayanan, A.
Regular biosequence pattern matching with cellular automata, 146:89
Laurio, K.
See Jonsson, P.
Lee, C.-H.
See Park, C.-W.
Lee, H.C.
See Moon, B.S.
Lee, J.W.
See Moon, B.S.
Lee, L.H.
See Li, D.
Lee, S.
See Hong, D.H.
Lee, S.-L. and Chung, C.-W.
Hyper-rectangle based segmentation and clustering of large video data sets, 141: 139
Lee, S.S.
See Shishibori, M.
Lee, V.C.S.
See Lam, K.-W.
Lee, Y.H.
See Moon, B.S.
Lempicki, R.A.
See Sidorov, I.A.
Li, D., Lee, L.H. and Ho, Y.C.
Constraint ordinal optimization, 148:201
Li, S.-T.
A platform-neutral live IP/TV presentation system, 140:33
Li, X. and Yu, W.
Dynamic system identification via recurrent multilayer perceptrons, 147:45
Liang, J.Y.
See Xu, Z.B.
Lim, S. and Kim, M.H.
Restructuring the concurrent B^+-tree with non-blocked search operations, 147:123
Lin, F., Ye, L., Duffy, V.G. and Su, C.-J.
Developing virtual environments for industrial training, 140:153
Linåker, F.
See Laurio, K.
Lindlöf, A. and Olsson, B.
Could correlation-based methods be used to derive genetic association networks?, 146:103
Liu, B.
Random fuzzy dependent-chance programming and its hybrid intelligent algorithm, 141:259
Lopez-Juarez, I. and Howarth, M.
Knowledge acquisition and learning in unstructured robotic assembly environments, 145:89
Lubovac, Z.
See Jonsson, P.
Luqi,
See Nada, N.

Ma, X.
See Trivedi, K.S.
Madria, S.K., Mohania, M., Bhowmick, S.S. and Bhargava, B.
Mobile data and transaction management, 141:279
Mańdziuk, J. and Shastri, L.
Incremental class learning approach and its application to handwritten digit recognition, 141:193
Martin, C.F. and Ho, Y.C.
Value of information in the Polya urn process, 147:65
Maruyama, O., Bannai, H., Tamada, Y., Kuhara, S. and Miyano, S.
Fast algorithm for extracting multiple unordered short motifs using bit operations, 146:115
Masatlioğlu, Y.
Numerical representation of binary relations with multiplicative error function, 144: 187
Matsuoka, H.
See Nishiwaki, Y.
Matsuoka, H., Nishiwaki, Y., Ryjov, A. and Belenki, A.

An evaluation method on the integrated safeguards based on fuzzy theory, 142:131
Maulik, U.
See Bandyopadhyay, S.
Mazumder, R.
See Zafar, N.
Mazure, B.
See Grégoire, É.
McKendall Jr, A.
See Cowan, R.D.
Megalooikonomou, V. and Yesha, Y.
Quantization for distributed estimation using neural networks, 148:185
Meladze, H.
See Criado, F.
Melin, P. and Castillo, O.
Intelligent control of aircraft dynamic systems with a new hybrid neuro–fuzzy–fractal approach, 142:161
Mili, A.
See Cowan, R.D.
Mimura, A.
See Iba, H.
Mirenkov, N.N.

Miyano, S.
See Maruyama, O.
Mohania, M.
See Madria, S.K.
Molla, M., Andreae, P., Glasner, J., Blattner, F. and Shavlik, J.
Interpreting microarray expression data using text annotating the genes, 146:75
Moon, B.S., Lee, H.C., Lee, Y.H., Park, J.C., Oh, I.S. and Lee, J.W.
Fuzzy systems to process ECG and EEG signals for quantification of the mental workload, 142:23
Mousavi, A. and Jabedar-Maralani, P.
Double-faced rough sets and rough communication, 148:41

Nada, N., Shing, M., Berzins, V. and Luqi,
Automated prototyping tool-kit (APT), 140:241
Nafkha, I.
See Gammoudi, M.M.
Nahrstedt, K.
See Xu, D.
Nakagawa, T., Tanaka, T., Ohkawa, T. and Nakamura, H.
A filtering method for high-speed retrieval of similar active sites, 146:55
Nakamura, H.
See Nakagawa, T.
Nakamura, H.
See Kaneta, Y.
Narayanan, A.
See Laurio, K.
Narayanan, N.H.
See Holmquist, S.
Nemoto, N., Tanaka, K. and Takizawa, M.
Quality-based synchronization methods of multimedia objects, 141:81
Nettleton, D.
See Huang, W.
Nguyen, H.T.
See Goodman, I.R.
Nguyen, N.T.
Consensus system for solving conflicts in distributed systems, 147:91
Nishiwaki, Y.
See Matsuoka, H.
Nishiwaki, Y. and Matsuoka, H.
Combined effects of atomic radiation and other agents in Hiroshima and Nagasaki and possible application of fuzzy theory, 142:77
Nolan, J.
See Simon, R.
Nørvåg, K.
A study of object declustering strategies in parallel temporal object database systems, 146:1

Oh, I.S.
See Moon, B.S.
Oh, S.-K. and Pedrycz, W.
The design of self-organizing Polynomial Neural Networks, 141:237
Ohkawa, T.
See Nakagawa, T.
Ohkawa, T.
See Kaneta, Y.
Okazaki, T., Inoue, A., Inoue, K., Ito, A. and Wang, Y.
Non-closure property of space-bounded two-dimensional alternating Turing machines, 146:151
Olsson, B.
See Lindlöf, A.
Olsson, B.
See Jonsson, P.

Olsson, B. and Laurio, K.
Towards a comprehensive collection of diagnostic patterns for protein sequence classification, 143:1
Oono, M.
See Shishibori, M.
Oussalah, M. and De Schutter, J.
Hybrid fuzzy probabilistic data association filter and joint probabilistic data association filter, 142:195

Papadimitriou, G.I., Pomportsis, A.S., Kiritsi, S. and Talahoupi, E.
Absorbing stochastic estimator learning automata for S-model stationary environments, 147:193
Park, C.-W., Lee, C.-H. and Park, M.
Design of an adaptive fuzzy model based controller for chaotic dynamics in Lorenz systems with uncertainty, 147:245
Park, J.C.
See Moon, B.S.
Park, M.
See Park, C.-W.
Patané, G. and Russo, M.
Distributed unsupervised learning using the multisoft machine, 143:181
Pawlak, Z.
Rough sets and intelligent data analysis, 147:1
Pedrycz, W. and Gacek, A.
Temporal granulation and its application to signal analysis, 143:47
Pedrycz, W.

Title index to volumes 140–148

A behavior-based architecture for autonomous underwater exploration
(Rosenblatt), 145:69

A class of instantaneously trained neural networks
(Kak), 148:97

A compiler for business simulations: Toward business model development by yourselves
(Tsuda), 143:99

A fast learning algorithm for time-delay neural networks
(Jiang), 148:27

A filtering method for high-speed retrieval of similar active sites
(Nakagawa), 146:55

A formal method for inheritance graph hierarchy construction
(Gammoudi), 140:295

A fuzzy decision support system for the economic calculus in radioactive waste management
(Kunsch), 142:103

A fuzzy logic controller for traffic junction signals
(Chou), 143:73

A GIS application to enhance cell-based information modeling
(Benedikt), 142:151

A light-weight agent architecture for collaborative multimedia systems
(Simon), 140:53

A mask matching approach for video segmentation on compressed data
(Kuo), 141:169

A method of comparing protein molecular surface based on normal vectors with attributes and its application to function identification
(Kaneta), 146:41

A mobile agent-based active network architecture for intelligent network control
(Chen), 141:3

A network processing model for address learning and IP recognition
(Tsai), 147:267

A new feature extraction technique for on-line recognition of handwritten alphanumeric characters
(Chakraborty), 148:55

A note on the hierarchical nature of *n*-parent variation operators in evolutionary algorithms
(Falkenauer), 141:273

A novel fuzzy logic approach to mammogram contrast enhancement
(Cheng), 148:167

A platform-neutral live IP/TV presentation system
(Li), 140:33

A pretopological approach for structural analysis
(Largeron), 144:169

A rule-based video database system architecture
(Dönderler), 143:13

A steganographic method based upon JPEG and quantization table modification
(Chang), 141:123

A study of object declustering strategies in parallel temporal object database systems
(Nørvåg), 146:1

A study on meaning processing of dialogue with an example of development of travel consultation system
(Kobayashi), 144:45

A tolerance approach for unbalanced economic development policy-making in a fuzzy environment
(Kim), 148:71

PII: S0020-0255(02)00420-6

A tool for measuring inheritance coupling in object-oriented systems
(AlGhamdi), 140:217
About the incremental validation of first-order stratified knowledge-based decision-support systems
(Grégoire), 142:117
Absorbing stochastic estimator learning automata for S-model stationary environments
(Papadimitriou), 147:193
Adaptive business intelligence based on evolution strategies: some application examples of self-adaptive software
(Bäck), 148:113
An application of calculated fuzzy risk
(Huang), 142:37
An application of weighted bootstrap method in semi-parametric model
(Tsai), 148:221
An evaluation method on the integrated safeguards based on fuzzy theory
(Matsuoka), 142:131
An evolutionary technique based on K-Means algorithm for optimal clustering in $\mathbb{R}^N$
(Bandyopadhyay), 146:221
An integrated architecture for tightly coupled design and evaluation of educational multimedia
(Holmquist), 140:127
Analysis of amino-acid sequences by statistical technique
(Tsumoto), 145:205
Analytic modeling of handoffs in wireless cellular networks
(Trivedi), 148:155
Application of global computational tools GeneOrder and CoreGenes to the comparative analyses of chordopoxvirus genomes
(Zafar), 146:127
Application of on-line neuro-fuzzy controller to AUVs
(Kim), 145:169
Automated prototyping tool-kit (APT)
(Nada), 140:241
Automatic outline capture of Arabic fonts
(Sarfraz), 140:269

Capital budgeting techniques using discounted fuzzy versus probabilistic cash flows
(Kahraman), 142:57
Classes extraction from procedural programs
(Ajroud), 140:283
Combined effects of atomic radiation and other agents in Hiroshima and Nagasaki and possible application of fuzzy theory
(Nishiwaki), 142:77
Consensus system for solving conflicts in distributed systems
(Nguyen), 147:91
Constraint ordinal optimization
(Li), 148:201
Correlation of intuitionistic fuzzy sets by centroid method
(Hung), 144:219
Corrigendum to "A modified Hausdorff distance between fuzzy sets"
(Bhutani), 148:233
Could correlation-based methods be used to derive genetic association networks?
(Lindlöf), 146:103

Deduction with uncertain conditionals
(Calabrese), 147:143
Design of a virtual community based interactive learning environment
(Jin), 140:171
Design of an adaptive fuzzy model based controller for chaotic dynamics in Lorenz systems with uncertainty
(Park), 147:245
Determinism and fuzzy automata
(Bělohlávek), 143:205
Developing virtual environments for industrial training
(Lin), 140:153
Diagonalisation of a class of multivariable system via an actuator linearisation technique
(Ringwood), 148:139
Digital geometry
(Rosenfeld), 148:123
Distributed unsupervised learning using the multisoft machine
(Patané), 143:181
Double-faced rough sets and rough communication
(Mousavi), 148:41
Dynamic system identification via recurrent multilayer perceptrons
(Li), 147:45

Embedding of level-continuous fuzzy sets on Banach spaces
(Román-Flores), 144:227
Evolutionary analysis of functional divergence in TGF-β signaling pathway
(Gu), 145:195
Evolutionary and expression profiles of gene families crucial for central nervous system development
(Wang), 145:215
Evolutionary modeling and inference of gene network
(Ando), 145:237
Expression pattern of yeast sporulation: a case study for regulatory changes after yeast genome duplication
(Huang), 145:261
Extracting compact fuzzy rules based on adaptive data approximation using B-splines
(Zhang), 142:227

Fast algorithm for extracting multiple unordered short motifs using bit operations
(Maruyama), 146:115
From a biological to a computational model for the autonomous behavior of an animat
(Frezza-Buet), 144:1
Fuzzy association rules and the extended mining algorithms
(Chen), 147:201
Fuzzy control rules extraction from perception-based information using computing with words
(Zhou), 142:275
Fuzzy expert systems architecture for image classification using mathematical morphology operators
(De Moraes), 142:7
Fuzzy systems to process ECG and EEG signals for quantification of the mental workload
(Moon), 142:23

Generation of efficient adjustment strategies for a fuzzy-neuro force controller using genetic algorithms – application to robot force control in an unknown environment
(Kiguchi), 145:113
Graph multidimensional scaling with self-organizing maps
(Bonabeau), 143:159

Hybrid fuzzy probabilistic data association filter and joint probabilistic data association filter
(Oussalah), 142:195
Hyper-rectangle based segmentation and clustering of large video data sets
(Lee), 141:139

Improvement of the LR parsing table and its application to grammatical error correction
(Shishibori), 148:11
Inclusion degree: a perspective on measures for rough set data analysis
(Xu), 141:227
Incremental class learning approach and its application to handwritten digit recognition
(Mańdziuk), 141:193
Inference of a gene regulatory network by means of interactive evolutionary computing
(Iba), 145:225
Information theory, evolution and the origin of life
(Yockey), 141:219
Intelligent assessment of distance learning
(Chia-I Chang), 140:105
Intelligent control of aircraft dynamic systems with a new hybrid neuro–fuzzy–fractal approach
(Melin), 142:161
Intelligent learning and control of autonomous robotic agents operating in unstructured environments
(Hagras), 145:1
Intelligent locomotion control on sloping surfaces
(Juang), 147:229
Interactive video streaming with proxy servers
(Reisslein), 140:3
Interpreting microarray expression data using text annotating the genes
(Molla), 146:75

Knowledge acquisition and learning in unstructured robotic assembly environments
(Lopez-Juarez), 145:89

MACLP: multi agent constraint logic programming
(Vlahavas), 144:127

MeGaDiP: A wide-area Media Gateway Discovery Protocol
(Xu), 141:37
Mobile data and transaction management
(Madria), 141:279
Morphogenic neural networks encode abstract rules by data
(Resconi), 142:249
Multimedia representation of matrix computations and data
(Vazhenin), 141:97

Neighborhood operator systems and approximations
(Wu), 144:201
New applications of relational event algebra to fuzzy quantification and probabilistic reasoning
(Goodman), 148:87
Non-closure property of space-bounded two-dimensional alternating Turing machines
(Okazaki), 146:151
Numerical representation of binary relations with multiplicative error function
(Masatlioğlu), 144:187

Oligonucleotide microarray data distribution and normalization
(Sidorov), 146:67
On batch-constructing B^+-trees: algorithm and its performance evaluation
(Kim), 144:151
On filters of implicative semilattices
(Jun), 143:197
Optimal stopping models in a stochastic and fuzzy environment
(Yoshida), 142:89
Optimization of fuzzy production inventory models
(Hsieh), 146:29

Parallel database sorting
(Taniar), 146:171
Parallelising large irregular programs: an experience with Naira
(Junaidu), 140:229
Preface
(Al-Ghamdi), 140:193
Preface
(Ruan), 142:1
Preface
(Shih), 141:1
Preface
(Shih), 140:1

Quality-based synchronization methods of multimedia objects
(Nemoto), 141:81
Quantization for distributed estimation using neural networks
(Megalooikonomou), 148:185

Random fuzzy dependent-chance programming and its hybrid intelligent algorithm
(Liu), 141:259
Reactive navigation and opportunistic localization for autonomous underground mining vehicles
(Roberts), 145:127
Reconfigurable networking for coordinated multi-agent sensing and communications
(Sutton), 148:103
Regular biosequence pattern matching with cellular automata
(Laurio), 146:89
Relaxing consistency requirement for read-only transactions
(Lam), 143:115
Relevance feedback in content-based image retrieval: some recent advances
(Zhou), 148:129
Restructuring the concurrent B^+-tree with non-blocked search operations
(Lim), 147:123
Robot learning with GA-based fuzzy reinforcement learning agents
(Zhou), 145:45
Robust adaptive fuzzy control and its application to ship roll stabilization
(Yang), 142:177
Rough sets and intelligent data analysis
(Pawlak), 147:1

Schedulable region for VBR media transmission with optimal resource allocation and utilization
(Chang), 141:61
Selecting rail grade crossing investments with a decision support system
(Forgionne), 144:75

Self-organizing feature maps predicting sea levels
(Ultsch), 144:91
Sensor-based learning for practical planning of fine motions in robotics
(Cervera), 145:147
Software engineering technology watch
(Cowan), 140:195
Some algebraic properties and a distance measure for interval-valued fuzzy numbers
(Hong), 148:1
Synthetic simultaneity – natural and artificial
(Caulfield), 144:143

Techniques for high quality Arabic speech synthesis
(Elshafei), 140:255
Temporal granulation and its application to signal analysis
(Pedrycz), 143:47
The bag model in language statistics
(Criado), 147:13
The design of self-organizing Polynomial Neural Networks
(Oh), 141:237
The RD-Tree: a structure for processing *Partial-MAX/MIN* queries in OLAP
(Yang), 146:137
TICLE: using multimedia multimodal guidance to enhance learning
(Scarlatos), 140:85
Towards a comprehensive collection of diagnostic patterns for protein sequence classification
(Olsson), 143:1
Two-dimensional packing algorithms for layout of disconnected graphs
(Dogrusoz), 143:147
Two-way fuzzy adaptive identification and control of a flexible-joint robot arm
(Gürkan), 145:13

Using functional annotation to improve clusterings of gene expression patterns
(Jonsson), 145:183

Value of information in the Polya urn process
(Martin), 147:65
Visualization of positive and convex data by a rational cubic spline interpolation
(Sarfraz), 146:239
